FOUL MURDER

Of Miss Pearl Bryan Legally Avenged.

All Efforts to Save Jackson and Walling From Death Failed.

These Partners in Crime Pass Into Eternity From the Scaffold.

The details of the betrayal and murder of Pearl Bryan have been printed far and wide. and it is not expected that these matters should again be paraded before the public, however great may be the demand for their rehearsal.

The lesson that we would draw from the fate of this unfortunate girl is to guard well against the first insinuations or actions inconsistent with most refined womanhood. Sad, sad indeed was the fate of this once innocent, confiding and loving girl.

The trial of her murderers has been full of excitement. Legal talent in their defense was not wanting; appeals for rehearing have been made to the Court of trial, Supreme Court and Executive clemency has been most persistently urged. Their cases have been most carefully reviewed. They have confessed and reconfessed, adding still more to their depravity. Their crime has been partially atoned for, the supremacy of the law over mob violence has been vindicated, the honor of our State has been saved from further degradation.

Scott Jackson and Alonzo Walling died upon the scaffold at Newport, Ky., on Saturday morning, March 20. Their conduct since their arrest and conviction has been such as to reveal their depravity. We say amen to the execution of these men and trust that the moral atmosphere of the country has been purified.

The W. C. T. U.

The first anniversary of the local W. C. T. U. was celebrated on last Sunday afternoon by a stirring address from the State President, Mrs. Frances E. Beauchamp, of Lexington. Her speech throughout bristled with living points and startling statements. With each passing year there is additional data as proof that the liquor traffic is a life destroyer, a destroyer of mind and reason and reduces man to a silly thing. Mrs. Beauchamp had words for the chewer of tobacco and the smoker of cigars and cigarettes. This practice she declared was little better than the use of intoxicants and that statistics proved it. "It has been said that the cigarette fiend would steal and that when a man went about with one of those dude ornaments in his mouth, he but advertised himself a thief." Rather hard language this but then there is data for the proof of it. The speaker appealed to fathers and mothers to inform themselves and see to it that their sons and daughters were developed into pure men and women. Mrs. Beauchamp's effort was highly complimented and every body was gratified to know that there was a woman of such great powers as President of the W. C. T. U. The Secretary made her report showing that with a beginning of 40 members, 47 had been added, 5 dismissed, and 5 added yesterday. The Treasurers report revealed the fact that \$17.95 in dues had been credited, \$32.01 from Mrs. Hoffman's lecture and \$4.75 from charity. The disbursements have been \$77.02, leaving a balance of \$7.69. The receipts on Sunday afternoon and evening were about \$12.20. This is a fine showing for the first year.

A SUGGESTION

WORTH CONSIDERATION OF ALL.

As Much Money Should Be Expended on Roads as on Rivers and Harbors.

After due inquiry and investigation I am of the opinion the most gross and outrageous swindle ever perpetrated on the American people is the annual appropriation known as the river and harbor bill. Not attempting here to go into particulars it is only enough to say that a very large proportion of this vast sum (usually between \$50,000,000 and \$80,000,000) is utterly wasted on small rivers and harbors and creeks used only by a few fishermen or tie cutters, or is spent in the ridiculous process of scooping sand (quick sand) in large rivers or lakes and ponds, sand that within a few days runs back again to its accustomed level.

I suggest that the wheelmen of the United States start a monster petition at once (at least such a petition will

with scarcely a murmur of complaint—a wrong that must cease and that right soon. The Congressional system of "log-rolling" trading and mutual back-scratching so long practiced can only be classed as the darkest chapter in American history. Of course it will be said that Congress must appropriate money only for rivers, harbors, etc., since they belong to the "eminent domain" while wagon roads must be subject to State jurisdiction. But right here, under the

though it is a road over which nearly as much business is carried on as over the Mississippi river at Quincy; and besides this the United States mail is carried over the same impassable road. Why such an enormous waste of money when such great good could be done by constructing a hard road near by with the ordinary care will last 1,000 years or more! I have given these two cases that have come under my observation. There are many others. Let us have more light along this line, and when the whole facts are laid before the people and before Congress I believe something will be done to inaugurate a day of real and permanent improvement.—A Citizen in an Exchange.

Why

Do people buy Hood's Sarsaparilla in preference to any other,—in fact almost to the exclusion of all others?

Because

They know from actual use that Hood's is the best, i. e., it cures when others fail. Hood's Sarsaparilla is still made under the personal supervision of the educated pharmacist who originated it.

The question of best is just as positively decided in favor of Hood's as the question of comparative sales.

Another thing: Every advertisement of Hood's Sarsaparilla is true, is honest.

Is the One True Blood Purifier. All druggists sell. Prepared only by C. I. Hood & Co., Lowell, Mass.

Hood's Pills are the only pills to take with Hood's Sarsaparilla.

soon develop into enormous proportions) to this end, that for every dollar appropriated to rivers, lakes, creeks, there shall be \$2 appropriated for the construction of good macadam roads, said roads in the main to be located at and between those points wherever the United States mail has to be carried by private vehicles or on horseback.

From the investigation I have made I am led to believe that during the last sixty years enough money has been utterly squandered on so-called rivers, creeks, ponds, lakes, etc., to have built over 35,000 miles of good macadam road that with ordinary care and repair would last 1,000 years I can give you here only the merest outline; in the meanwhile urging you to make full inquiry and get the proper committees appointed who shall at once take the necessary steps to get the names of at least 10,000 voters to some such petition as I have indicated.

I am not writing as a Republican or a Democrat or as a wheelman, but as a citizen who sees the needs of the country as well as the egregious wrong the people have suffered at the hands of Congress for so many years

guise of an old custom which is only an old falsehood, is where the great wrong is committed, and the worse than idiotic waste still goes on from year to year. Without attempting to enter a discussion of this question in extenso, I will cite a case or two by way of illustration.

At the present time a large force of men, engaged by the government, is clearing the logs, rocks and rubbish out of Osage river in Missouri. Intelligent experts now engaged in this particular work confess that the whole expenditure is utterly wasted so far as the public good is concerned; the only person benefited being perhaps a few railroad tie cutters on the upper tributaries of this so-called river. At Quincy I noticed two scows with patent scoops lifting the quicksand out of the river under pretense of opening a new channel. Intelligent men in Quincy of all parties told me that this large expenditure by the government was utterly wasted, as the sand flowed back nearly as quick as water and again filled up the channel.

Now take note of the fact that the wagon road leading due west of Quincy is in a horrible condition
